

# Let's save energy together.

Also when at school.

## Dear pupil

We've made some changes at school to reduce the amount of energy we use. For example, we've turned down the heating, so please take some extra clothes with you if you think it's cold.

You can help too, by switching off the light in your classroom and in the toilet when you leave, and by washing your hands in cold water.

If we all make an effort, we can make a difference.
